JULIO SANTACRUZ | FULL-STACK DEVELOPER

Tijuana, MX | (664) 217-1518 | julio.santacruzh@gmail.com | juliosantacruz.dev | Github | LinkedIn

PROFESSIONAL SUMMARY

Experienced developer skilled in building robust web applications and interfaces, adept in utilizing technologies such as React (with TypeScript), Django, and Next.js. Proficient in UI/UX design tools like Figma and experienced in deploying projects on platforms like Vercel and GitHub Pages. Strong background in project management and BIM consultancy, fostering collaboration across teams and driving successful project outcomes.

SKILLS

- **Programming Languages:** Python, C#, CSS, SQL, Typescript, JavaScript (ES2015+)
- **Frameworks:** DJango, Django-RestFramework, .NET, React, Next.js, AstroJs
- **Software:** VSC, GIT, Postman, SQLServer, GIMP, MS Office.
- **Services**: ChatGPT, Stripe, Sendgrid, Google API, AWS S3, AWS RDS, GitHub Pages.
-**Methodologies:** Responsive Design, DDD, Scrum, Blackbox Testing, White Box Testing,
- **Languages:** English, Spanish

PROJECTS / PROFESSIONAL EXPERIENCE

FullStack Developer, Exertus | 08/2024 - Current
- Develop web applications with **React** and **Material UI**, and backend services with **.NET C#.**
- Design and optimize **SQL** databases, create tables, queries, and perform data analysis.
- Build integrations with **Google Maps API** and **ZEBRA printers**.
- Contribute to the corporate inventory management system for large warehouses.
- Use **Git** and **GitHub** for version control and collaboration.

FullStack Developer, IQEA Ingeniería | 08/2023 - 06/2024
- Develop web applications with **Next.js**, **React** (**Typescript**), **SASS, three.js** and **zustand** as a state manager.
- Develop backend applications with **python (Django)** and **javascript (Strapi)**
- Developed the corporate page with **Next.js** and **Strapi**, obtaining a lighthouse score of 95%
- Develop user interfaces with **Figma**
- **Git** was used as a version controller, **github** as an online repository and MVP was deployed on **Vercel**

Frontend Developer, Volante Technologies 12/2022 - 05/2023
- Develop web applications interface to be **Responsive** with **React (Typescript)**.
- Connect the customer registration form to a **backend** to store the information
- Used **SCSS** and **Ant-d components** to create the product interface.
- Collaborated with a global team using **SCRUM** methodology to create and execute a new product.
- **GIT** was used as version controller locally and **Gitlab** to manage the project and deploy the project

FullStack Developer, BIMCapacitacion.com 11/2020 - 10/2022
- Develop web page interface to be **Responsive** with **HTML5, CSS**, **Javascript** and **React**
- Designed this blog page using **Python/Django** framework configuring **user authentication, forms and web templates** and used **Postgresql** database to store users information and posts, it was hosted on **heroku** service
- My participation in this web page was making content related to Revit Software, such as blog posts, video tutorials(YoutubeChannel) and images.

FullStack Developer, Discounts.city 10/2019 - 10/2020
- Designed this blog page using **Python/Django** framework configuring **user authentication, forms and web templates.**
- Develop web page interface to be **Responsive** with **HTML5, CSS, Javascript** and **Bootstrap**
- Configuring **AWS RDS & S3** for database and storage
- Implement and configure third-party APIs and services such as Stripe for the payment gateway, **Sendgrid** for external messaging service like restored password and newsletter and Google Maps service to locate every store in a map.
- The **Blackbox tests** with the user interface, the customer profiles and **Whitebox tests** with the submission of forms to the database and registration of coupons.
- Deployment of the **MVP** for production using **Heroku**

JULIO SANTACRUZ | FULL-STACK DEVELOPER

Tijuana, MX | (664) 217-1518 | julio.santacruzh@gmail.com | juliosantacruz.dev | Github | LinkedIn

Proconst App | Side Project
- Develop the app with **React** (**Typescript**), **SASS** and **zustand** as a state manager.
- **AWS Cognito** was used as a user manager
- Develop user interfaces with **Figma**
- **Git** was used as a version controller, **github** as an online repository and MVP was deployed on **github pages**

Project Manager - Freelance, 1/2018 - 5/2019
Develop the BIM model of the Costa by Frasa project with **Autodesk Revit** +**100** apartments
-Selection and hiring of external providers and adequate personnel for the development of the Costa By Frasa project.
- Leadership in organizing and conducting weekly follow-up meetings, promoting communication between teams to coordinate progress and achievements.
-Integration of the projects prepared by the contractors in the Costa By Frasa master plan, ensuring a coherent alignment with the strategic objectives and the global vision of the company.
- Established a solid starting point for the coordination of the engineering companies involved, identifying areas for improvement of the Kyo-ILAN construction project
-Developed the clash detection of the BIM model with Navisworks and coordinated the designers to solve all the interferences of the KYO-Ilan project **+ 80** housing units

BIM Consultant - JFS Construction, 1/2014 - 4/2019
- Training and coaching for professionals of all ages to implement **Revit, SketchUp, NavisWorks, AutoCAD, Excel,** and **Budget Calculation** for construction for their daily work And **BIM** methodology.
-Develop BIM models of electrical systems for different industrial buildings, medium voltage substations and high voltage lines to optimize the use of materials and reduce errors when building
-Develop virtual tours (**3D - Augmented Reality - Virtual Reality**) of construction projects as a sales and construction coordination tool, with **Revit and Navisworks from Autodesk**
-Develop the Base model of the "River Walk" shopping plaza with **Autodesk Revit**, for the coordination of the **269,000** sqf project.

Data Engineer - Freelancer, 8/2012 - 8/2016
-Develop a spreadsheet that generates reports to calculate the price and construction costs of retaining walls in housing development of more than **300** houses.
-Develop the BIM model of the foundation of a wind turbine for the la rumorosa wind farm to organize more than **10** tons of reinforcing rebar.

EDUCATION
B.S. in Civil Engineering, GPA: 3.5/4.0 CENEVAL-EGEL
Technological Institute of Tijuana (ITT)

COURSES AND CERTIFICATIONS
- Google Data Analytics Specialization *(2025) Coursera / Google*
- Project Manager with agile methodology *(2024) Coursera / Google*
- Full Stack Developer con JavaScript *(2023) Platzi*
- Responsive Web Design *(2022) freeCodeCamp.com*
- React Bootcamp *(2022) codigofacilito.com*
- Scrum Pro Course *(2022) Platzi.com*
- Web Accessibility Course *(2022) Platzi.com*
- Frontend Developer Course *(2020) Platzi.com*
- Software Testing Fundamentals Course *(2021) Platzi.com*
- Building a Paid Membership site with Django *(2020) Lynda.com*
- Become a Django Developer *(2019) Lynda.com*
